Clinical Study Data Analyst (f/m/d) Ophthalmology

Do you want to be a part of the development of a treatment for AMD?

To achieve this, our international team works closely with physicians and clinical specialists worldwide to further improve retinal treatment with our unique Navilas® navigated laser system. Join our team and take part in saving the eyesight of patients with our innovative product.

Your tasks:

- You help us carry out clinical studies with our class IIb medical devices by
    - Continuous advancement of our clinical strategy and subsequent study design
    - Define hypothesis and endpoints, develop study protocols and obtain ethical approval
    - Review the data, define the data analysis and create a clear and concise data analysis presentation
- You drive our literature review in the team and develop manuscripts for scientific publications with our investigators, KOLs and MAB
- You will work closely with our clinical study team and data scientists to collect and process data of our clinical trials

Your profile:

- Bachelor`s or Master`s degree in Biology, (Bio-)medicine, Ophthalmology or Optometry
- Experience in Ophthalmology is essential
- 3+ years relevant professional experience in a scientific setting
- You enjoy constantly drawing new conclusions
- Your work philosophy is marked by high quality standards
- You are fluent in German as well as English, both written and verbal
- Good knowledge in regulatory requirements in medical devices (PMS, CER, MDR) is a plus!

We offer:

- An exciting and diversified job in a growing, innovative company with agile working teams
- Plenty of room for initiative and personal development
- Strong team spirit with flat hierarchy, which we strengthen with regular team events.
- Attractive conditions with 30 days vacation per year and an above-average bonus system

Have we aroused your interest?

Then we should get to know each other!
